SYSTEM NAME	**TRAINING, COMPETENCE & RESPONSIBILITY** PROCEDURE
SYSTEM NUMBER	RNSWP004
PURPOSE & SCOPE	To ensure that RNSW meets its workplace health, safety, quality & environment responsibilities to educate and assist individuals in their workplace. This procedure applies to all employees, contractors, and visitors.
CONNECTING DOCUMENTS	RNSWF005 Organisation Chart RNSWF006 Job Description Template RNSWF007 Employee Contract Template RNSWF008 Employee Induction Form RNSWF009 Training Register RNSWF010 Induction Register RNSWF011 Training Record Form

TERM	DEFINITION
Needs assessment	Review of education, training, skills, and experience needed to perform work
Awareness	Having knowledge, being informed and alert
Competence	A demonstrated ability to apply knowledge, training and skills to a particular task
Record	Document stating results or evidence of activities performed

TASK	STEPS	FREQUENCY	POSITION
ROLES & RESPONSIBILITIES			
RNSW Organizational Chart	The **organisational chart** is created and conveys the different role areas and levels within the company. The organisational chart is created annually and updated at each monthly management meeting as required. The chart is displayed around the company and stored on the Document Masterlist.	Monthly	HR Team
Setting Position Descriptions	Each position on the company organisational chart must have Position Description that outlines the following: • Name of Position • Who they report to in the company • Roles & responsibilities • Key performance indictors	As required	HR Team

TRAINING & COMPETENCE – COMPANY EMPLOYEES			
General Company Induction	All employees shall complete an **HSEQ online induction** in **Smartsheet** prior to starting with the company. The induction process is as follows: 1. The online induction **HSEQ Online Induction Video** is accessible on the HSEQ Dashboard. 2. Each Employee is to complete the induction and answer the questions by clicking in the link at the end of the induction. 3. Each submitted induction is then recorded on the **RNSWF010 Induction Register.** All inductions are valid for a period of 12 months from the time of the induction completion date. The **RNSWF008 Employee Induction Form** is to be completed and filed in the **RNSWF010 Induction Register.** All training records are to be stored on the **RNSWF009 Training Register**	Before employee starts work	HR
Identification of Training Needs	For each task or work practise, the specified training is identified, and training needs are assessed. All Managers must report to the HSEQ Team for any further training needs that need to be completed. Training needs or lack of training may be identified through incident reports, hazard reports and audits or inspections.	Before new work is conducted / assessed yearly	Senior Management Team
Skill gap analysis	Based on the training needs for each particular role, each personnel are assessed to ensure that they have the necessary skills, competencies and qualifications. All new employees are assessed before they start work and all personnel are assessed on a yearly basis or as required.	Before new work is conducted	Senior Management Team
Task Specific Induction	All personnel must be trained in the work they complete. Work activity inductions are conducted following the specific induction and SOPs. All personnel must sign-off to say they have completed the specified training.	Before new work is conducted	Manager

Skill-Hire training	All skill-hire personnel must undergo the same induction training required by the company personnel.	As Required	Manager
Management & Supervisors Training	All Managers & Supervisors must undertake specific training to ensure that they understand their responsibilities.	As Required	HR Team
Training in SWMS & SWIs	All required staff is to be trained in SOPs before they undertake any activity. Any updates or changes to these documents must be communicated to the required personnel.	Before new/updated SOP is implemented	Project Managers & Managers
Toolbox Meetings	Toolbox meetings are an additional training opportunity for discussing specific risks and hazards, risks and hazards associated with specific work activities, general HSEQ issues, SWMS, and ideas for improving how work is done to address HSEQ concerns.	As Required	Manager
Employee Consultation on Training	Employees are consulted on their own training needs in the following circumstances: • The process of developing procedures requires that supervisors check with staff whether any additional training is required in order to carry out the work safely. Supervisors encourage employees to speak up about training needs during these sessions. • All employees are entitled to nominate themselves for training when they perceive a training need.	As Required	Manager

TRAINING & COMPETENCE – TRANSPORT PROJECTS			
Project HSEQ Induction	All site workers shall review and sign off on specific SWMS and plans. A client induction may also be required. All contractors must be approved in the Approved contractor management system. Refer to **RNSWP006 Contractor Management**.	Before Starting work on a project	Project Team
Competency Requirements for Transport and	The site team shall ensure that all persons conducting work as defined in the HSEQ Regulations, hold a current "**Certificate of Competency**" for the work they are to perform. Certificates of Competency shall be recorded on the Site Induction form, together with a copy of the Certificates, where practical. The minimum project competency requirements are identified under the training section within the project HSEQ Plan. This is to be updated for each project. The competency requirements for RNSW personnel are defined in Appendix B of this procedure.	Before Starting work on a project	Project Team
Verification of Competencies	Verification of Competency shall be confirmed prior to the commencement of independent work activities. To verify competencies for workers operating Vehicles and Plant/ Equipment the relevant supervisor or manager needs to view one of the following: • High-Risk Work Licence issued by a State or Territory under the National Certification System as per the legislation; and • where a High-Risk Work Licence is not required by legislation, any of the following must be provided as evidence of competence: ▪ Licence or Certificate of Competency issued under previous State or Territory legislation for which there is no longer a High-Risk Work Licence required e.g. load shifting equipment; or ▪ Statement of Attainment or Certificate issued by a Registered Training Organization (RTO) for the successful completion of the appropriate unit of competency in the Nationally Recognized Training (NRT) package; or ▪ A formal verification of competence	As required	Project Team

	assessment. All record of training for each worker must be either kept as follows: • Contractor Worker – In **Project Induction Register** • Staff – In **Training Register**

Staff Inductions	Smartsheet	15 years	Delete	HSEQ Manager
Project HSEQ Video Inductions	Smartsheet	7 years	Delete	HSEQ Manager
Site specific Inductions – Completed Form	Smartsheet	7 years	Delete	HSEQ Manager
Licences	Smartsheet	7 years	Delete	HSEQ Manager
VOCs & SOAs	Smartsheet	7 years	Delete	HSEQ Manager

Appendix A – Classification Table

CLASSIFICATION	DESCRIPTION	LICENSE/CERTIFICATE/COMPETENCY
Asbestos	Remove non-friable asbestos	CPCCDE3014A
	Remove friable asbestos	CPCCDE3015A
	Supervise asbestos removal	CPCCBC4051A
	Workers carrying out asbestos-related work (non-removal	Trained in identifying asbestos and safehandling
Air quality monitoring	Carry out air quality monitoring	Qualified Hygienist
Concrete Pump	Concrete placing booms	PB
Cranes	Bridge and gantry cranes	CB
	Derrick crane	CD
	Non slewing mobile cranes greater than three tonnes capacity	CN
	Portal boom crane	CP
	Slewing mobile cranes	C2, C6, C1, C0
	Vehicle loading crane	CV
Dogging	Dogging	DG
EWP	Boom-type elevating work platform	WP
	Scissor Lift	WP or Yellow Card
Electrical	Electrical work	Electrical Contractors License
Fall arrest/fall restraint –use of	Using falling arrest or fall restraint equipment	WP, working at Heights training
Fall prevention system	Installation of fall preventionsystem	Training in the installation procedure by manufacturer
First Aid	Occupational First aid	Level 3 OFA/L3
	Senior First aid	Level 2 SFA
Forklift	Forklift truck	LF
	Order-picking forklift truck	LO
Formwork	Formwork Inspection	Engineer
	Installation of formwork systems	Evidence of training in formwork system
Gas fitting	Gas fitting work	Contractor's license, supervisors' certificate,tradesman
Hoist	Materials platform hoist	HM
	Personnel and material hoists	HP
Installation of fall arrest attachment points	Install anchor points for fall arrest. fall restraint	Trained in manufacturers system, rigger
Load Shifting	Front end loader	LL or a certificate of competency issued by aregistered training organisation

CLASSIFICATION	DESCRIPTION	LICENSE/CERTIFICATE/COMPETENCY
	Front end loader/backhoe	LB or a certificate of competency issued bya registered training organisation
	Front end loader of the skid steertype	LS or a certificate of competency issued bya registered training organisation
	Excavator.	LE or a certificate of competency issued by a registered training organisation
	Telescopic Handler < 3 tonne	Certificate of competency issued by a registered training organisation
	Telescopic Handler > 3 tonne	CN
Plumbing		Contractor's licence, supervisors' certificate,tradesman
Rigging	Basic rigging	RB
	Intermediate rigging	RI
Refrigeration/air conditioning work	Air-conditioning and/or refrigeration work	Supervisor License or Contractors licensefor air-conditioning or refrigeration work
Scaffolding	Advanced rigging	RA
	Basic scaffolding	SB
	Intermediate scaffolding	SI
	Advanced scaffolding	SA
Structural support	Inspection structural supports	Engineer
Swinging Stage	Assessment of supporting structure	Engineer
	Installation, erection, dismantling	Advanced Scaffolding Licence, AdvancedRigging Licence
	Operating swinging stage	Trained in safe work practices for swing stage including, daily inspections, load calculations & emergency procedures
	Inspection of cradle and suspension system	Advanced Scaffolding Licence, AdvancedRigging Licence
Traffic Control	Control traffic with a Stop/Slow bat	Traffic Control
	Set up and work with Traffic Control Guidance Schemes/Traffic Control Plans at a work site	Implement Traffic Control Plans
	Design new traffic management plans and TCGS/TCP's for road works, produce major upgrades of standard plans and/or inspect traffic control plans on road construction sites	Prepare a Work Zone Traffic ManagementPlan
