SYSTEM NAME	**CONTRACTOR MANAGEMENT** PROCEDURE
SYSTEM NUMBER	RNSWP006
PURPOSE & SCOPE	To ensure that all contractors are controlled and are made aware of applicable HSEQ hazards & Impacts.
CONNECTING DOCUMENTS	RNSWF014 Approved Contractor Register

TASK	STEPS	FREQUENCY	POSITION
What is a Contractor	Contractors include any service providers/individuals who are not direct workers (employees) of the company and are providing services/works in relation to maintenance and repair work. Services can be of a short- or long-term nature. This includes all sub-contractors that complete work for or on-behalf of the company.	-	-
Arranging a Contractor	Where a service need is identified that cannot be completed by the company, the person requiring this service must ensure that the contractor to be engaged is competent and possesses the necessary qualifications. Examples of services that may be required are: • Contractors working on RNSW Projects • Plumbing works • Electrical works	Before using the contractor	HSEQ Team
Onboarding Contractors into Approved Contractors Register	All contractors must be approved in the **RNSW014 Approved Contractors Register** in Smartsheet prior to awarding or using any services. To engage a new contractor, follow the below steps: 1. Send the contractor the online webform here below to register the following: • Company Details • Insurances • Management System Status **New Contractor Registration Form** 2. Once the contractor has submitted the form, their details will be logged into the approved contractors register in Smartsheet and will appear **RED.** 3. The HSEQ Manager is to review the Contractor information and update the approval status to one of the following: • **APPROVED** • **NOT APPROVED** • **APPROVAL PENDING**		

	4. Once **APPROVED** an auto request for accounts information is sent to the contractor to update. If **NOT APPROVED** or **APPROVAL PENDING** is selected, the HSEQ Manager is to relay to the contractor the outstanding requirements and why the contractor has not been approved.		
Minimum Requirements for Engaging Contractors	Contractor Evaluations shall be conducted prior to engagement and/or when there is a significant change to scope of work being performed utilising project evaluation tool(s). The Contractor has must have the following in place to be **APPROVED**: 1. **Required Insurances** – Refer to Appendix A 2. **Compliant WHS Management System** that is either: ISO 45001:2018 Certified *OR* A WHS Management system Policy, Manual and sample SWMS for the work they undertake. This is to be reviewed for compliance by HSEQ Manager. 3. **Compliant Environmental Management System** that is either: ISO 14001:2015 Certified *OR* An Environmental Management system Policy and Manual for the work they undertake. This is to be reviewed for compliance by HSEQ Manager. 4. **Compliant Quality Management System** that is either: ISO 9001:2015 Certified *OR* A Quality Management system Policy and Manual for the work they undertake. This is to be reviewed for compliance by HSEQ Manager. **No EPA or Government Regulator Safety Notices.** If the contractor does have notices, they must be supplied along with corrective actions completed. The HSEQ manager is to review and approve at their own discretion.		

Engagement of Approved Contractors onto project	Prior to engaging any **APPROVED** contractors onto a new project or work, the contractor must supplier the following: 1. A Safe Work Method Statement (SWMS) for all High-Risk Activities. This is to be reviewed using the **RNSWF002 SWMS Review Checklist**. 2. All necessary licences, currency of training and competency certificates are held for all applicable personnel for work to be undertaken. 3. List of Plant & Equipment along with Plant Risk Assessments 4. List of Hazardous Chemicals proposed to use on site along with Safety Data Sheets.		
Contractor Permit to Work	Contractors may be required to complete a Permit to Work form if any of the works include 'hot work' such as welding or grinding. The original Permit is to be maintained by the contractor completing the work, and a copy maintained by the HSEQ Team.	As Required	HSEQ Team
Contractor & Visitor Sign-in/out	All visitors and contractors must sign in and out using the QR code sign in at the front reception area. The contractor must then be escorted to the work area to familiarize them with any foreseeable hazards they may face whilst carrying out the work.	Every Time	HSEQ Team
Non-conforming Contractors	All non-conforming contractors will be monitored. If there is evidence of recurring breaches of safety, they will be removed from the list, and if necessary; a permanent removal will be applied.	Immediately	HSEQ Team
