SYSTEM NAME	**HAZARDOUS CHEMICALS** PROCEDURE
SYSTEM NUMBER	RNSWP008
PURPOSE & SCOPE	To ensure that all hazardous chemicals is effectively purchased, used, maintained and disposed of in a safe manner.
CONNECTING DOCUMENTS	RNSWF021 Hazardous Chemical Register

TASK	STEPS	FREQUENCY	POSITION
Risk Management for Hazardous Chemicals	All risks to health & safety from the storage use and handling of hazardous chemicals must be either eliminated or reduced following the company's SAFE Risk Management Program. That is: 1. **S**pot the hazard 2. **A**ssess the Risks 3. **F**ix the problem 4. **E**valuate the effectiveness of the controls put in place To incorporate this process, a hazardous chemical register must be kept. Where high risk or large quantities of chemicals are involved a risk assessment must be carried out.	As required	HSEQ Team
Hazardous Chemical Register	All hazardous chemicals that are used by the company in larger than household quantities are recorded on the **RNSWF021 Hazardous Chemicals Register** in Smartsheet. The register is to be reviewed annually and is continually updated when new chemicals are purchased or removed.	Annually/When new equipment is purchased	HSEQ Team
Hazardous Chemicals Register for Projects	All Hazardous Chemicals for projects are referenced in the SWMS or the Project management plan for each project. They are used and stored in accordance with this procedure	Each Project	Project Manager
Safety Data Sheets (SDS)	SDS's are to held and located in an accessible area where the chemical is being stored or handled. A sign should indicate the location of the SDS Folder or on the **RNSW021 Hazardous Chemicals Register** in Smartsheet. SDS's are to be of current issue and not more than 5 years from date of issue.	Checked Annually	HSEQ Team
Handling & Storage of Hazardous Chemicals	Hazardous chemicals are to be stored according to the information contained on the SDS. Where there is a danger of fire or chemical leak, approved cabinets may be required.	As Required	HSEQ Team

Disposal of Chemicals	All Hazardous Chemicals must be disposed of in a manner that is in line with environment legislation	As required	User
Training	All persons using hazardous chemicals are to be trained in the safe handling, storage and disposal of them	Before use	HSEQ Team
Consultation	Consultation with workers is required at every step of the risk management process when identifying and controlling electrical risks. By drawing on the experience, knowledge and ideas of your workers you are more likely to identify all hazards and choose effective risk controls.	Always	HSEQ Team
