SYSTEM NAME	**WASTE & RESOURCE MANAGEMENT** PROCEDURE
SYSTEM NUMBER	RNSWP010
PURPOSE & SCOPE	This procedure is a guide for staff in the disposal, removal and management of waste from the organization's premises, including general waste, paper and cardboard, redundant oils and chemicals, mobile phones, chemicals, fuels, paints, toner, ink printer cartridges, construction waste
CONNECTING DOCUMENTS	-

TASK	STEPS	FREQUENCY	POSITION
Paper and Cardboard	Receptacles for waste paper and cardboard are provided on the premises in offices, in the operations area or at workstations. These are emptied by the cleaners. If necessary, individual staff may empty waste paper/cardboard into the larger paper/cardboard container. Confidential or sensitive documentation is to be shredded. When the shredder bin is full it may be emptied into the large recycle bin. Bulk confidential or sensitive documentation is kept until end of year; bins are hired for 1 week for secure disposal of documents by a recycling contractor.	As Required	All Staff
General Waste	Rubbish bins for waste other than paper and cardboard is provided on the premises and is emptied weekly by the cleaner and/or staff. Rubbish bins in the kitchen are used for food waste.	As Required	All Staff
Redundant Furniture and Fittings	Where possible, furniture/fittings in a good state of repair are either reused by the organization or donated to a local service. The removal of white goods is negotiated with the deliverer of the replacement white goods. Computer equipment is reused where possible. Superseded or broken computer equipment is sent to or picked up by our ISP.	As Required	All Staff
Mobile Phones	Broken and obsolete phones with the battery connected are disposed of via instructions with mobile phone.	As Required	All Staff

Photocopier Toner and Printer Ink Cartridges	Where possible, remanufactured toner cartridges are used. When replacing toner cartridges, staff follow manufacturer's instructions supplied with the toner cartridges for the replacement, storage and disposal of used cartridges. All used toners are placed in the toner cartridge bin. The toner supplier collects used cartridges for recycling when delivering new cartridges. The company the supplier as new cartridges are needed.	As Required	All Staff
Chemical and Industrial Waste	Chemical and Industrial Waste is segregated according to properties. The SDS must be consulted for appropriate disposal methods. Waste must be labelled to accurately reflect contents, including name and contact details of waste generator, description of contents and date of generation. It must be stored in a suitable container and housed appropriately until collection. Arrangements must be in place for waste to be collected regularly by the licensed waste contractor for appropriate off-site treatment. In some cases, chemical waste may be treated in-house but only if the material(s) convert to a non-hazardous product.	As Required	All Staff
Construction Waste	Construction Waste is segregated and collected on-site according to properties. It must be stored in a suitable space until collection. Arrangements must be in place for waste to be collected regularly by the licensed waste contractor for appropriate off-site recycling or treatment. Minimize waste by producing/ procuring only the amount required.	As Required	HSEQ Team
