SYSTEM NAME	**DOCUMENT CONTROL** PROCEDURE
SYSTEM NUMBER	RNSWP012
PURPOSE & SCOPE	The purpose & scope of this procedure is to ensure that all company documents and data which form part of the integrated management system are issued and maintained under controlled conditions and that all documents and data are reviewed and approved by authorized personnel prior to issue.
CONNECTING DOCUMENTS	RNSWF023 Document Masterlist

TASK	STEPS	FREQUENCY	POSITION
Developing a new document	Anyone in the organisation can raise a new controlled document. The document is made up as a draft and sent to the applicable team members for a review. After being circulated in the team for any comments and agreement reached as to suitability, the document is sent to the HSEQ Team for approval. Documents are able to be revised and include but are not limited to: 1. Specifications and drawings 2. Integrated management system manual 3. Operational procedures and forms 4. External documents	As Required	All Company Personnel
Approving the Document	The HSEQ Team is to approve the document with the input from management or applicable personnel.	Within one week	HSEQ Team
Give the Document a Number	Once approved, the document is given an identification number in accordance with the folder it is stored in and the **RNSWF023 Document Masterlist** on Smartsheet	Within one week	HSEQ Team
Upload the document onto the Master list of Documents	Once given a number, the title, number, revision and date are loaded into the **RNSWF023 Document Masterlist** held on Smartsheet	Within one week	HSEQ Team
Distribution of Document	The distribution of the document is based on the **RNSWF023 Document Masterlist**. The controlled document must be circulated in accordance with the distribution column.	As Required	HSEQ Team

Reviewing and revisions (changes) of documents	Any changes or periodical reviews that need to be made are made following the same process as stated for new documents. 1. Anyone can express the need for a change in a document or a review of a document 2. The changes are sent to all applicable personnel for comments 3. The document is sent to the HSEQ Team for approval. 4. The revision is changed on the document and on the **RNSWF023 Document Masterlist**. The revised document is sent to all applicable personnel stating that the document has changed.	As Required	HSEQ Team
Obsolete documents	Obsolete documents are removed from points of use and may be retained for reference or for legal obligations are marked 'OBSOLETE' and kept separate from active documents. Obsolete documents are stored and retained in accordance the Control of Records Procedure. Filing cabinets containing obsolete documents are segregated and labelled 'OBSOLETE'. Obsolete electronic documents are removed from the network and are stored in media that is accessible upon request. Any obsolete documents that need to be reactivated must be reviewed, approved and released in the same manner as newly established documents.	Immediately	HSEQ Team
External Documents & legal Requirements	All External, Standards, codes and other legal requirements are controlled asper the Legal & Other requirements Procedure	As Required	HSEQ Team
