SYSTEM NAME	**INCIDENT MANAGEMENT** PROCEDURE
SYSTEM NUMBER	RNSWP017
PURPOSE & SCOPE	The purpose of this procedure is to establish and define the process for an effective accident and incident investigation program which methodically examines all undesired events that have or could have resulted in physical harm to people, damage to property, loss to process or pollution of the environment. The intent of these investigations is to establish facts and circumstances related to the event to determine the root cause and develop remedial action to control the risk.
CONNECTING DOCUMENTS	RNSWF028 Injury, Hazard & NCR Form

STAGES	STEPS	ACTIONS	RESPONSIBILITY
Incident Reporting & Investigation	**Incident & Injury Reporting**	In the event of an incident – whether someone gets hurt – site personnel must immediately notify the HSEQ Team member and Management. The HSEQ Team must: • consider stopping all work associated with the incident. • notify Management that an incident has occurred carry out an investigation.	**HSEQ Team**
	Incident Investigation	Investigations are recorded on the **Injury, Hazard & NCR Form** which guides the investigation to establishing the immediate cause, contributing factors and corrective actions. All incident investigations must be completed by the HSEQ Manager and Project Manager. The Incident investigation report must be signed by all required parties on the form and filed in NCR Register. All corrective actions are then loaded onto the NCR Register**.** A prompt within the Smartsheet must be set for the target completion date. All incident investigations must be presented to management for there review and consideration.	**HSEQ Team**
Injury Management	**Injury Management**	When a worker is injured their HSEQ Team: • makes sure the injury has been reported to WHS Manager using the Injury report. • offers the injured worker treatment by first aiders.	**HSEQ Team**
	Injury Follow-up	Regardless of what treatment the injured worker opts for, the HSEQ Team and/or Management must follow up with the injured worker the next day to: • determine their fitness for work • establish whether they have a medical certificate that limits their activities	**HSEQ Team**

STAGES	STEPS	ACTIONS	RESPONSIBILITY
	Developing Return to work plan	A Return-to-Work Plan is developed when the staff member cannot initially return to pre-injury duties. Within 3 days of notification of a significant injury, the RTW Coordinator will contact all relevant parties to establish a Return-to-Work Plan. • document all the activities and procedures that are undertaken to achieve a timely, safe and durable return to work • state how, when and where the injured employee will return to pre-injury duties • detail how the duties match with medical advice identify the progress towards the return-to-work goal by fortnightly monitoring.	**HSEQ Team & RTW Manager**
Reporting Incidents to Authorities	**Notifiable Incidents**	The company reports all notifiable incidents the relevant Authority. Where such an incident has occurred, the company considers whether the site needs to be preserved for investigation by the relevant authority. Reporting occurs as per timeframes detailed in the table under this procedure.	**HSEQ Team & Management**
	SafeWork NSW Reporting	Notifiable Incidents are incidents that are deemed significant by WorkSafe NSW and fall into three (3) different categories: • the death of a person • serious Injury or illness; and • a potentially dangerous Incident Refer to the WorkSafe NSW for more information and reporting contact methods. ***Click Here***	**HSEQ Team & Management**
